# WHY IRN COMAC MEDICAL SITE ALLIANCE & SUPPORT

## **Top Task to meet study requirements...**

- > Appropriate & Timely completion of the Study documentation (Case Report Forms, temperature logs, patient logs, Drug accountability logs, etc.)
- > Maintenance of the Investigator Site File and Patient binders
- > Handling, allocating and reporting on the study drugs

## **Subject recruitment and retention:**

- > Initial review of patient pools and subject pre-selection
- > Regular review of databases for newly diagnosed patients
- > Subject referrals from the alternative patient recruitment platforms

# WHY IRN COMAC MEDICAL SITE AUGMENTATION

## **Tailored Solution to meet study requirements:**

- > Conduct of Clinical Trials at Alliance Sites with IRN personnel (Sub-Investigators, SC, Site Manager, Data Entry) as per Protocol requirements
- > Centralized oversight, Site support, Supply and equipment maintenance
- > Patient referral, recruitments & retention (R3 process) solutions for your Trials

## **We ensure:**

- > Faster Study Start-up
- > Quality and integrity of Study Data
- > Site support resulting in decreased burden for the PI
- > Audit Readiness from Start to the End of the Clinical Trial
- > Meeting the recruitment targets within/ahead of the required time frame

## **Clinical Site Manager:**

- > Ensuring timely recruitment delivery per site and per country
- > Key contact with Clinical Site Teams
- > Thorough project oversight on site support level
- > Risk management and issue escalation
- > Regular Site Support & Augmentation team meetings
- > Training by Site Augmentation Support Team
- > Quality Oversight at site level

# WHY IRN COMAC MEDICAL HOME CARE SERVICES

**With clinical trial nurses and physicians covering CEE, IRN can work with sponsors, CROs, and study sites to provide extensive services at patient's home, including:**

- > Sample collection
- > Intravenous infusions
- > Injections
- > Centrifuge operation
- > Observations/ Vital Signs/ECG's
- > Patient education

Our team of clinical trial nurses and physicians understand the specific demands of research and are very well-versed in the care of research patients of all ages, many of whom have a combination of health conditions and/or rare diseases participating in studies of varying complexity.
